Circulating Collagen Biomarkers as Indicators of Disease Severity in Pulmonary Arterial Hypertension

J Am Coll Cardiol HF 2014;2:412-21

Under the Biochemical Measurements of Indices of Collagen Metabolism section, the following sentence:

Enzyme-linked immunosorbent assays were used to determine serum C1TP levels, and double antibody radioimmunoassays were used to determine P1IINP levels according to the manufacturer's specifications.

should have read:

C1TP levels were determined using radioimmunoassay and double antibody radioimmunoassays were used to determine P1IINP levels according to the manufacturer's specifications.

Figure 1A and 2A: The unit for P1IINP should have been ug/l instead of ug/ml.

The authors apologize for these errors.
